PROFESSIONAL SUMMARY

To get an entry-level opportunity with an esteemed organization where I can enhance my skills and broaden my experience in software engineering, full-stack development, and AI/ML, leveraging my passion for learning and commitment to professional growth, while contributing to the success and growth of an organization through my dedication, creativity, and strong work ethic.

TECHNICAL SKILLS

- **Programming Languages:** Java, Python, JavaScript, TypeScript, Kotlin, C, SQL
- **Full Stack Development:** React.js, Next.js, Node.js, HTML5, CSS3, Responsive UI, Reusable Component Libraries, Lazy Loading, Code Splitting, State Management, WebSockets, WebRTC
- **Backend and APIs:** FastAPI, Flask, Express.js, Go (Golang), RESTful API Design, gRPC, JWT Authentication, Secure Access Control
- **AI and Machine Learning:** PyTorch, scikit-learn, Hugging Face Transformers, Model Fine-Tuning, NLP, ML Inference Integration, Real-Time Data Pipelines
- **Cloud, DevOps and Databases:** AWS S3, Docker, CI/CD, GitHub Actions, PostgreSQL, MongoDB, SQL, Agile/Scrum, Code Reviews, Git

PROJECTS

CareerForge — AI-Resume-Architect (ATS Optimizer) *Live Demo*
Node.js, Express.js, MongoDB, React.js, TypeScript, Vite, Tailwind CSS, Stripe, REST APIs, Groq LLM

- Built a Node.js/Express + MongoDB backend for resume CRUD, ATS optimization workflows, and user-scoped data access.
- Implemented JWT auth with Google OAuth, protected routes, and profile management.
- Integrated Stripe subscriptions (checkout, portal, webhooks) with plan enforcement and usage limits.
- Orchestrated Groq LLM services to parse, rewrite, and boost ATS-aligned resumes via structured JSON.

StudyFinder — AI-Powered Collaborative Learning Platform *Live Demo*
Python, Node.js, React.js, TypeScript, WebRTC, WebSockets, REST APIs, Docker

- Shipped a full-stack platform on Render, bridging Python ML inference services with a Node.js REST API and a React.js/TypeScript frontend — load-tested to 200+ concurrent users with k6.
- Wired a gRPC service interface between the Node.js layer and Python ML scoring service, slashing inter-service latency by 40% versus the prior REST implementation.
- Crafted a graph-based collaborative filtering engine, improving cold-start recommendation accuracy by 22% across new user cohorts.
- Resolved WebRTC signalling bottlenecks, cutting peer-to-peer connection latency by 50%, and rolled out 5 real-time analytics dashboards that accelerated issue detection by 60%.

SQLTown — Full-Stack SQL Learning Platform
Python, FastAPI, PostgreSQL, React.js, JavaScript, Docker, AWS S3

- Launched a React.js and FastAPI full-stack platform with a PostgreSQL execution engine processing 500+ daily query submissions at 99.5% uptime (verified via UptimeRobot over 30 days).
- Scoped and released RESTful API endpoints in FastAPI for query submission, evaluation, and progress tracking, keeping median response time under 120ms.
- Established an automated test evaluation pipeline with syntax validation and test-case scoring, verifying 100% of student submissions before grading.
- Containerised the full application with Docker across 3 environments (dev/staging/prod) with CI/CD pipelines, reducing setup time by 70%; connected AWS S3 for production asset storage.

EDUCATION

Bachelor of Technology — Computer Science Engineering
Specialization: Artificial Intelligence and Machine Learning
Sagi Rama Krishnam Raju Engineering College 2023 – 2027 (Class of 2027)
Relevant Coursework: Data Structures and Algorithms, Object-Oriented Design, Database Management Systems, Computer Networks, Operating Systems, Software Engineering, Machine Learning, Deep Learning, Web Technologies

CERTIFICATIONS

- AWS Cloud Foundations — Amazon Web Services View
- Python Essentials 1 — Cisco Networking Academy View
- Python Essentials 2 — Cisco Networking Academy View
- Cybersecurity Essentials — Cisco View
- Android Developer Internship Certificate — Google View
- Cybersecurity Internship Certificate — Palo Alto Networks View
- Software Engineering Virtual Experience — Forage View
- Solutions Architecture Virtual Experience — Forage (AWS) View
